CS4233—Network Programming Final Project Guideline

- Group work: 2~3 persons (Max==3)(special case: 1 person)
- **5/09**: (1) Please hand on your proposal and group members and (2) E-mail
- Proposal concept:
    - Title and names
    - Program functions (covering range)
    - Expected results
- Application examples
    - Fully functional FTP client/server
    - Fully functional VoD (Video on Demand) system
    - E-mail software with POP3 and SMTP functions
    - Multi-users network game
    - P2P software
    - Window-based Multicast server/client
    - Live video streaming server
    - Advanced Muliti-user IM
    - Others…
- Program Tool:
    - C/C++/C#/Java/android…
    - UNIX socket/win socket/java socket…
    - Window-based programming in UNIX: QT or GTK+
    - Others…
- Demo time: To be announced
- Demo package including
    - Report（cooperation work, code comment, system architecture, operating steps, function description…）
    - Source code
    - Execution file
